

## Session 18

***Ipads for the Common Core Curriculum: An Engaging and Interactive Tool Tailored to Individual Student Needs***, presented by Pamela Watkins

Session 18 will use information from peer reviewed journal articles to support the position that iPads are engaging to all students, but the engagement factor is crucial for students with disabilities to sustain. iPad applications to use will be discussed and a list of apps with a brief description will be provided to the audience. Development of a systematic program for incorporating the iPad into the Common Core Curriculum and pre and post assessments to collect data on whether the apps being used are having a positive effect on student progress will be discussed.

Ms. Watkins prefers to e-mail her presentation to participants only and will not be submitting it for web posting.
