Everyone is using Google Drive individually, as a school as a department. The problem is that we each create shared docs, spreadsheets, folders, etc. and then we actually have to remember what it was called; who shared it, where is it, which of the four items named very much the same is the one I want? Oh and by the way Google is a search engine...How to search drive! Why organize when you can search? Participants will leave with a Google Site with examples and directions that will be keep up to date!

The presentation can be found at
<https://sites.google.com/a/nhcs.net/where-in-the-google-is-it/>

Creating a Google site allows me to have the most up to date information for you. Any new research or ideas can be added up until the session begins and the Site can be updated.
