Questions & Answers
1. When a student’s IEP team recommends a modified day, they determine which goals will be the focus during the time in school.

- Is the continuum based on the time the student starts school through the time the student leaves for the day? For example, the student spends one 90 minute block in special education. School day starts at 9:00 and student leaves at 12:00.

- Would the continuum remain regular or does the remainder of the day 12:00-3:00 also count toward the continuum?
Evaluation/Child Find

2. If a parent provides the school a written request for a special education evaluation, but no interventions through a student support team (SST) have been completed, can the IEP referral team send the request back to SST for interventions OR is the referral team obligated to move forward with testing?
3. For eligibility in the category of ED, how are we to determine if the student needs specialized instruction as opposed to mental health intervention?

• If the student does not need specialized instruction would counseling be appropriate as part of an 504 plan?
IEP/Permission to Test

4. Following an IEP team meeting where testing was decided to be conducted and the parent signed a DEC 2, can additional testing be added to a new DEC 2 following the meeting and mailed for the parent to sign (with a DEC 5 completed that explains what has happened and the need for additional assessment(s))?

- Or does the IEP team need to reconvene to add the additional testing to the DEC 7 or DEC 1?
9. Can you all talk about the OCS criteria for participation?

We have received two (2) students from another county with IQs in the 90s being served as LD in the OCS. Such an injustice to the students. Can you talk about how to handle this when it happens?
10. Are Speech Therapists expected or required to provide “interventions” to students prior to an EC Referral if articulation, fluency or language are concerns?
11. Is an LEA (EC Department) required to pay for “general education” opportunities for three year old students with a disability if the child is not in a child care setting?
